

Adolf Hitler

Early Life:

Adolf Hitler was born in 1889 in Braunau am Inn in Austria. His father abused him; his mother did not. Mr Hitler wanted to be a painter, but because of the failure he was he could not achieve his dreams and was rejected from art school. He moved to Germany in 1913 and served in the military in WW1. Hitler was injured in the war and was saddened and bitter that Germany lost the war. This bitterness would play a pivotal role in the starting of the "event" he began. Hitler became a government spy after his time in the military, but this was short-lived as he soon joined the precursor to the Nazi party. In 1921 he became the head of the Nazi party, he was an incredible public speaker and in 1933 the Hitler came into power.

"Deeds":

Hitler was a very active ruler. He demanded the Sudetenland of Czechoslovakia shortly after coming into power. He was given the Sudetenland by the allies in 1938(of-course, Czechoslovakia was not consulted). Shortly after getting the Sudetenland Hitler ate Czechoslovakia. In this year Hitler also did a **staged** referendum in Austria asking if they wanted to join Germany, obviously the answer was yes. In 1939 Hitler invaded Poland with the **SOVIET UNION**, betraying the 10 year non-aggression-pact he signed in 1934. This resulted in the completely insignificant event that was WW2 which resulted in a mere 70-85 million casualties. Hitler then proceeded to commit genocide on the Jews and take over most of Europe. His doom was his decision to invade the **SOVIET UNION** (breaking another non-aggression-pact) which repelled his invasion and started to push back. Hitler was stubborn and did not surrender, but it did not matter. In 1945 the Soviets invaded Berlin and Germany lost the

war. Adolf Hitler committed suicide in his bunker and his body was burned by Nazi officials.
